

Weather Policy

The Club does not cancel scheduled rides due to weather conditions. Weather forecasts are subject to change and may not accurately reflect conditions at the time of the ride. Accordingly, the decision to participate rests with each individual rider.

All riders are responsible for assessing their own safety and comfort level. Those who do not feel comfortable riding in wet or otherwise adverse conditions are encouraged to refrain from participating. There is no obligation to attend any ride, and members are reminded that ample opportunities to ride in more favourable conditions will arise throughout the season.

During the summer months, periods of reduced air quality may occur. Members are strongly encouraged to review current air quality conditions before attending a ride and to make participation decisions accordingly. As the Club is not aware of individual health circumstances, members with asthma or other underlying health conditions should exercise particular caution.
